

Aloe plicatilis

COMMON NAME	Fan Aloe
FAMILY	Aloeaceae
ORIGIN	South Africa
EVERGREEN	Yes
FLOWER COLOUR	Red
BLOOMTIME	Winter/Spring
SYNONYMS	[Kumara disticha]
HEIGHT	1.5 - 2.5 Metres
WIDTH	1 - 2 Metres
EXPOSURE	Full sun
SEASIDE	-
IRRIGATION	Low Water Needs
WINTER HARDINESS	-6° C

FURTHER READING:

Aloe plicatilis is an attractive and interesting plant to have in a sunny garden. As such, it is increasingly used as an ornamental plant for drought tolerant landscaping and rockeries. However, it grows very slowly outside of its natural habitat and is often in danger of being overgrown, smothered and killed by faster growing plants that are near it. Plant in the sun and water occasionally during summer months. Needs winter and spring irrigation if grown where it does not receive adequate water from rainfall.
