

Yucca rostrata 'Sapphire Skies'

COMMON NAME	Yucca
FAMILY	Agavaceae
ORIGIN	Southwest U.S.
EVERGREEN	Yes
FLOWER COLOUR	White
BLOOMTIME	Spring
SYNONYMS	-
HEIGHT	3.5 - 5 Metres
WIDTH	2 - 2.5 Metres
EXPOSURE	Full Sun
SEASIDE	-
IRRIGATION	Low Water Needs
WINTER HARDINESS	-17° C

FURTHER READING:

A beautiful blue-gray selection of the slow-growing tree-like yucca with upright stems and beautiful gray-blue narrow foliage. Although it can branch, it is most often seen with a single trunk, that can grow to 2 - 2.5 metres tall. The 60cm long, stiff, slightly waxy, pale bluish-green leaves with yellow margins, form a dense rosette on top of the stems. The old leaves fall off leaving a fibrous soft gray covering on the trunk.

Growers Notes: The plant will be available in 110L containers early 2017.
